ABOUT CROWOOD

Crowood remanufactures a wide range of toners and PCU units for Printers, Photocopiers and Fax Machines.

We produce three 'quality' standards:

- Performance - Contains only OEM Parts
- Economy - OEM carcass with near OEM quality compatible parts (toner, drums etc).
- Original - Genuine OEM branded items

Crowood is a trade only supplier and can ship direct to your end user plain label.

PERFORMANCE

OEM cartridge refilled using OEM toner

NEW - MPC3001 / MPC4501 Colour Drum Modification

Please note the following may invalidate your product warranty. No responsibility is accepted for any damage to machine, drums or other parts, supplies or processes as a result of this information. The below is provided for information only and any modification is at your own risk.

There are three main differences between the new MPC3001 family of colour PCU's and the MPC2800 family black PCU.

The three main differences are:

1. Holding Pin inside MPC3001 family PCU separation tray
2. Holding Pin at rear of MPC2800 black PCU
3. Wiring loom & connector on MPC2800 black PCU

STEP ONE is to remove the pin that is on the PCU separation plate inside the copier itself. This is best done with a Dremmel or a heavy duty wire cutter. If you are right handed, you may find it easier to remove the toner pump (two screws) to make access to the pin plate easier. Take care not to put excessive bend on the plate, it needs to be straight when finished. This is a one-time adjustment.

Trim the plate at the back of the colour PCU separation plate.

Before

After

STEP TWO is to remove the pin at the rear of the black MPC2800 PCU. Take care when doing this that you do not remove more of the plastic framework than necessary as this would impair the performance of the drum.

STEP THREE is to swap over the wiring loom and grind down the RJ45 style connector, as per the black to colour PCU modification on the MPC2800 range of drums. Please see our separate tutorial on modifying the black MPC2800 PCU to fit the colour housing if you are unfamiliar with this process.
